

L^AT_EX THESIS TEMPLATE: AN UNOFFICIAL VERSION

AUTHOR NAME

ID 1888888

A THESIS SUBMITTED TO
VIDYASIRIMEDHI INSTITUTE OF SCIENCE AND TECHNOLOGY
IN PARTIAL FULFILLMENT OF THE REQUIREMENTS FOR
THE DEGREE OF DOCTOR OF PHILOSOPHY
IN INFORMATION SCIENCE AND TECHNOLOGY
2023

Title: L^AT_EX Thesis Template: An Unofficial Version
Advisor: Asst. Prof. Dr. Advisor Name
Name: Mr. Author Name
Program: Doctor of Philosophy Program in Information Science and Technology
 (International Program)
Examination Date 10 October 2023

Vidyasirimedhi Institute of Science and Technology approved this thesis as a partial fulfillment of the requirements for the degree of Doctor of Philosophy in Information Science and Technology.

Examination Committee:

..... Chairperson (Asst. Prof. Dr. Committee Member 1) Member (Asst. Prof. Dr. Committee Member 2)
..... Member (Asst. Prof. Dr. Committee Member 3) Member (Asst. Prof. Dr. Committee Member 4)
..... Member (Dr. Committee Member 5)	

.....
(Prof. Dr. Pimchai Chaiyen)
Chairperson
Graduate Studies Committee

L^AT_EX Thesis Template: An Unofficial Version

Abstract

Author Name

This abstract presents a dummy content block intended to simulate a real thesis abstract. It spans multiple paragraphs and includes enough text to overflow onto the second page. The purpose of this demonstration is to observe how LaTeX handles hanging indents and vertical spacing, especially in custom environments such as keywords.

Keywords: LaTeX formatting, thesis template, abstract layout, hanging indent, vertical spacing, custom environments.

Acknowledgment

I would like to express my sincere gratitude to everyone who has supported me throughout this journey.

First and foremost, I am deeply thankful to my advisor, Dr. Jane Smith, for her invaluable guidance, constructive feedback, and constant encouragement. Her mentorship has been instrumental in shaping both the direction of this research and my development as a researcher.

I am also grateful to the members of the Computational Intelligence Lab for the stimulating discussions, technical assistance, and collaborative spirit that made every challenge more manageable and every success more rewarding.

Special thanks to my friends and colleagues, whose humor, advice, and moral support helped me maintain perspective during stressful times.

Lastly, I owe my deepest appreciation to my family for their unwavering belief in me. Their love and patience provided the foundation that carried me through the ups and downs of graduate life.

This work would not have been possible without all of you.

Chapter 1

Introduction

1.1 Motivating Problem

This section describes the research motivation that forms the foundation of the thesis.

1.2 Contributions

This thesis makes the following key contributions:

- We introduce a novel experimental paradigm that addresses key limitations in the current research.
- We propose a novel algorithm that enhances learning performance across multiple tasks.

1.3 Outline

This thesis is divided into three major parts:

Chapter 2: This chapter provides a comprehensive background and reviews relevant literature related to the topic.

Chapter 3: This chapter investigates the proposed methodology and its theoretical foundations.

Chapter 4: This chapter presents the experimental setup, results, and analysis.

Chapter 5: This chapter summarizes the key findings and contributions of the thesis and discusses potential directions for future work.

Appendix A: This appendix provides additional details on the experimental setup

and data analysis methods used in this thesis.

Chapter 2

Background

2.1 Heading

This is a paragraph under the main section. It introduces the overall content of the section in a general manner.

2.1.1 Sub-heading

This is a subparagraph under the first subsection. It provides additional detail or clarification related to the subsection's topic.

2.1.1.1 Second-level Sub-heading

This is a subsubparagraph under the second-level subheading. It is typically used for listing or elaborating fine-grained points.

- 1) This is the first item in the enumerated list.
- 2) This is the second item in the enumerated list.
- 3) This is the third item in the enumerated list.

2.2 Equation

As an illustration of L^AT_EX's mathematics formatting, Equation 2.1 is the definition of *Rényi entropy* and Equation 2.2 is the total loss function:

$$H_{\alpha}(X) = \frac{1}{1-\alpha} \log \left(\sum_{x \in \mathcal{X}} P[X=x]^{\alpha} \right). \quad (2.1)$$

$$\mathcal{L}_{\text{total}} = \frac{1}{N} \sum_{i=1}^N \{w_i \mathcal{L}_i\}. \quad (2.2)$$

2.3 Algorithm

This is an example of Algorithm 2.1.

Algorithm 2.1 An algorithm with caption.

Require: $n \geq 0$

Ensure: $y = x^n$

```

1:  $y \leftarrow 1$ 
2:  $X \leftarrow x$ 
3:  $N \leftarrow n$ 
4: while  $N \neq 0$  do
5:   if  $N$  is even then
6:      $X \leftarrow X \times X$ 
7:      $N \leftarrow \frac{N}{2}$ 
8:   else if  $N$  is odd then
9:      $y \leftarrow y \times X$ 
10:     $N \leftarrow N - 1$ 
11:   end if
12: end while
```

► This is a comment

2.4 Table

LaTeX table generators, such as TablesGenerator.com¹, can help you easily create well-formatted tables. Here, Table 2.1 is an example of a table generated using the tool.

Table 2.1 Classification performance. An asterisk (*) indicates values that are significantly different from the others ($p < 0.05$).

Comparison Model	Subject-independent	
	Accuracy \pm SD	F1-score \pm SD
FBCSP-SVM	64.96 \pm 12.70	65.25 \pm 15.14
Deep Convnet	68.33 \pm 15.33	70.20 \pm 15.18
EEGNet-8,2	68.84 \pm 13.87	70.39 \pm 14.30
Spectral-Spatial CNN	68.27 \pm 13.56	65.86 \pm 17.37
MIN2Net	72.03 \pm 14.04*	72.62 \pm 14.14*

¹<https://www.tablesgenerator.com/>

2.5 Figure

Here are examples of figures in a thesis: Figure 2.1 illustrates a standard image inclusion, while Figure 2.2 shows a chemical reaction diagram generated with `chemfig`.

Figure 2.1 This is a long figure caption example for an image. This figure demonstrates how to include a standard image (e.g., PDF, PNG, JPG) into your document. Captions longer than one line should be aligned left and indented after the first line.

Figure 2.2 An esterification reaction illustrated using the `chemfig` package.

2.6 Citation

This is an example of how to cite previous work, such as [1], or multiple sources like [2–4]. Ensure that the corresponding BibTeX entries are added to the `bibliography.bib` file before citing.

Below is an example BibTeX entry:

```
@ARTICLE{dummy2022example,  
  author   = {Doe, John and Smith, Jane and Roe, Richard},  
  journal   = {Journal of Example Studies},  
  title     = {A Dummy Title for Demonstration Purposes},  
  year      = {2022},  
  volume    = {42},  
  number    = {1},  
  pages     = {1--10}  
}
```

2.7 Footnote

I'm writing to test the `\footnotemark` and `\footnotetext` commands. You can insert a footnote marker using the `\footnotemark2` command and later typeset the footnote text by writing `\footnotetext{Example footnote.}`.

Let's do one more to see the result³, which I'll comment on within the footnote.

²Example footnote.

³Specifically, I'd write comments in this one.

Chapter 3

How to Use This Template

3.1 Overview

This chapter provides guidance on how to effectively use and customize the VIS-TEC L^AT_EX thesis template. It explains the general structure, key files, and recommended practices to help users quickly adapt the template for their own thesis writing.

3.2 Directory Structure

The template is organized into clearly separated folders and files to simplify management:

- `main.tex` — The main file to compile your thesis.
- `thesisinfo.tex` — Define your title, author information, advisor, and committee.
- `contents/` — Contains all chapter, appendix, and special section files.
- `figures/` — Store all figures, images, and plots used in the thesis.
- `tables/` — Store external table files if needed.
- `bibliography.bib` — Your BibTeX bibliography database.

3.3 Editing Thesis Metadata

Edit `thesisinfo.tex` to set your thesis title, author name, student ID, academic year, advisor, committee members, and program information. These metadata fields automatically populate the title page, approval page, and other formal sections.

3.4 Adding Content to Chapters

Each main chapter (e.g., Introduction, Background, Investigations, Conclusion) should be placed under `contents/` and included using `\include{}` in `main.tex`. You can create additional chapter files following the provided structure, and organize sections, figures, tables, algorithms, and citations inside them.

3.5 Inserting Figures, Tables, and Equations

Use standard LaTeX environments to insert figures, tables, and equations. Examples are provided in `contents/chapter2.tex`. Figures and tables should include proper captions, labels, and cross-references using `\autoref{}` to maintain consistency.

3.6 Citing References

Manage your references in `bibliography.bib` using BibTeX format. Cite references in your chapters using `\cite{}` for in-text citations and `\fullcite{}` when listing complete citations. The Vancouver bibliography style is automatically applied.

3.7 Compiling the Thesis

Use pdfLaTeX as the compiler. A typical compilation sequence includes:

- First, run `pdflatex main.tex` to generate auxiliary files.
- Then, run `bibtex main` to generate the bibliography.
- Finally, run `pdflatex main.tex` twice to resolve cross-references.

Alternatively, tools like `latexmk` or IDEs like Overleaf, TeXShop, and VS Code with LaTeX Workshop can automate this process.

3.8 Notes and Recommendations

- Regularly back up your files.
- Keep figures and tables in separate folders to maintain a clean project.
- Use consistent citation and figure labeling conventions.

- Compile often to catch errors early.

Chapter 4

Investigation 2

4.1 Section 1

This section presents the second investigation carried out in this study.

Chapter 5

Conclusion

This chapter concludes the thesis by summarizing the key findings, discussing their implications, and outlining potential future directions for research in brain-computer interfaces and assistive technologies.

Appendix A

Proofs for Chapter 4

A.1 Proof of Lemma

This section provides the detailed proof of the lemma stated in Chapter 4. The proof follows standard steps in mathematical derivation and demonstrates the validity of the stated result.

Author's Biography

Name:	AUTHOR NAME
Date of Birth:	February 19 th , 1993
Place of Birth:	Bangkok, Thailand
Current Address:	555 Vibhavadi Rangsit Road, Chatuchak, Bangkok 10900
Education:	<p>Bachelor of Science in Computer Science, Lorem Ipsum University, Bangkok, Thailand (2011–2014)</p> <p>Master of Science in Computer Science, Lorem Ipsum University, Bangkok, Thailand (2015–2017)</p>
Scholarship:	Recipient of the full scholarship from Vidyasirimedhi Institute of Science and Technology (VISTEC)
